

Junior First LEGO™ League Teams Now Forming!

A Program in Science, Technology, Engineering and Math for K-3

Want a program that inspires kids using familiar tools they love? Form a Jr. FLL team and allow your students' imagination and enthusiasm grow! Junior FIRST LEGO League captures the interest of the youngest learners. They research how robots are used in Medicine, create ideas to demonstrate their models using LEGOs, use programs to drive gears and motors, and have a whole lot of fun! The Jr. FLL Program gives kids a unique opportunity to show their design creativity in a meaningful, team based project and showcase their work in a regional judged exposition.

Eligibility

- Any group can create a team: schools, community groups, churches, neighborhoods
- Up to 6 children, ages 6 to 9, and at least one adult coach
